

The College of Science and Mathematics (CSM) is proud to provide pre-med and pre-health students a variety of resources to support their related academic and career goals. CSM is dedicated to inspiring and teaching future healers and scientists. Prescriptions for student success starts here.

Pre-Med & Pre-Health Support Services

All students in CSM have both a Professional Advisor and a Faculty Advisor to offer major exploration, degree planning, and to connect them to enrichment and research opportunities.

Enrichment Opportunities

Tufts University School of Medicine - UMass Boston Pre-Medical Enrichment Program

Each January, approximately twenty-four of our pre-medical students spend three weeks at the Tufts University School of Medicine as part of an enrichment program designed to introduce future doctors and scholars to the kind of teamwork inherent in medical problem-solving.

Baccalaureate MD Pathway Program

The UMass Chan Medical School Baccalaureate MD (BaccMD) Pathway Program is a multiphase program that provides selected students from the UMass undergraduate campuses with the opportunity of provisional acceptance into T.H. Chan School of Medicine at UMass Chan Medical School.

Medical School Admissions Data

**Students
accepted in 2022**

**Students
accepted in 2023**

**Students
accepted in 2024**

Schools that have accepted the most UMB students over the last 3 years.

- Tufts University School of Medicine
- University of Massachusetts T.H. Chan School of Medicine
- Drexel University College of Medicine
- Frank H. Netter MD School of Medicine at Quinnipiac University

Related Student Organizations

- Phi Delta Epsilon - Pre Med Fraternity
- Pre Health Undergraduate Guidance Club
- Undergraduate Biology Club
- Minority Association for Pre-Medical Students (MAPS UMass Boston)

Pre-Med Program of Study

This program offers matriculated students a comprehensive curriculum and advising support as they prepare for careers in medicine and health-related fields. Successful completion of the program is recorded on their official University transcripts when they have met all graduation requirements. Students in the program are required to take a minimum of ten science courses (excluding labs). These courses include the basic courses in math, chemistry, physics, and biology as well as selected advanced science courses and introductory coursework in psychology and/or sociology. Students graduate with the degree they are pursuing, with the distinction of having complete the Pre-Med program of study.

Pre-Med List Serve

All interested students are welcome to sign up for the “Pre-Med List Serve”. During the academic year emails are sent to students inviting them to events, opportunities, and highlighting resources for pre-med students.

Special Events

The College of Science & Mathematics Student Success Center hosts special events for all Pre-Med students throughout the academic year including but not limited to:

- Medical school visits
- AAMC Informational Sessions
- Visits from current physicians
- Live Q&A events on critical med school topics
- Bacc MD info session (every Fall)
- Tufts MD info session (every Fall)

Faculty Led Research

As Boston’s only public research university, our students gain access to state of the art research labs right here on campus! Participating in significant, independent research is a distinct advantage. As an undergraduate, you will have a head start applying what you learned in class. Data collection, experimentation, observation, and calculation are fundamental research skills you’ll develop.
